

Instruction Manual

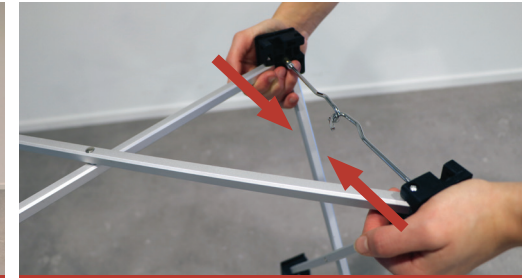

Magnetic Counter

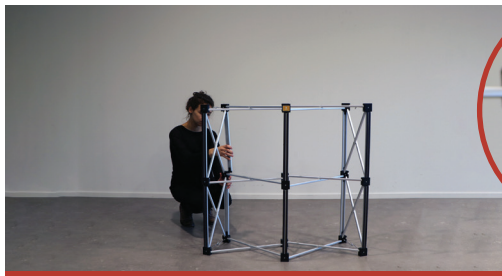

This counter is packed in 3 bags (from left to right: frame, table top, shelf + bars) and 1 tube (print).

1. Open the frame by pulling the bars up- and outwards, with the mark 'top' facing up.

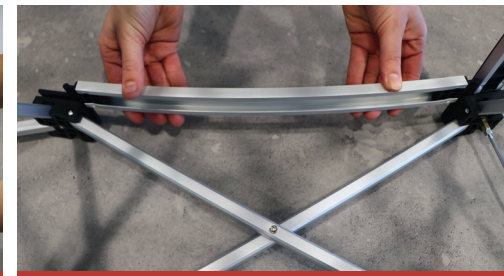

2. Push the hinges towards each other and lock the frame by connecting the metal hooks.

3. Place the **straight bars** vertically in the frame (6 pcs. on front side, 4 pcs. on backside).

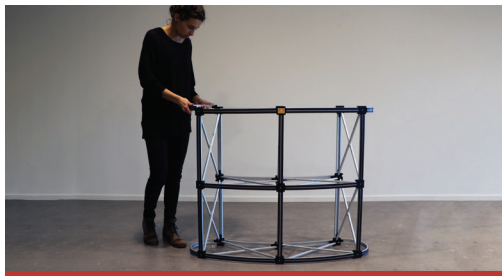

4. Insert the pointed topside of the bar in the groove. Lift slightly and slide in the bottom side of the bar.

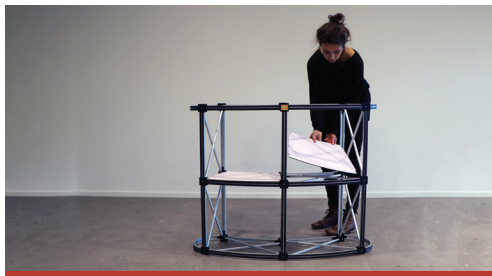

5. Place the **short curved bars** horizontally on the backside of the frame.

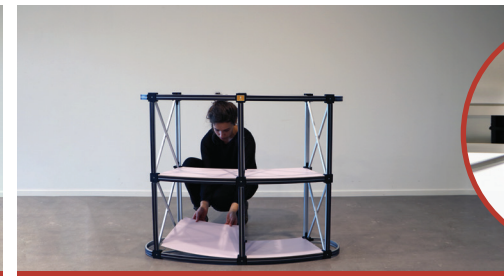

6. Place the **long curved bars** horizontally on the frontside of the frame.

7. Place the **U-shaped bars** horizontally on the sides of the frame (top and bottom).

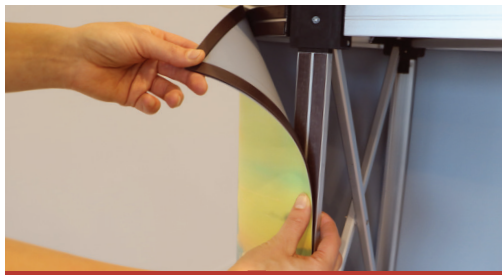

8. Place the shelves in the center of the frame. The shelves can hold up to 20 kg

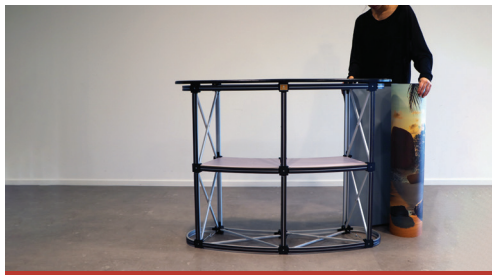

Optional: place 2 extra shelves on the bottom of the frame for more storage space.

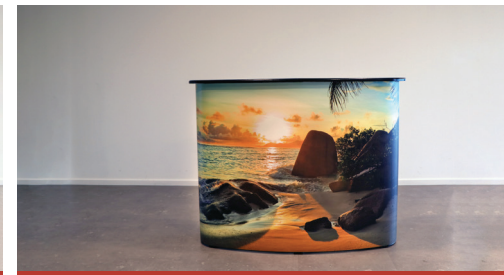

9. Fold open the table top and put it in place. The metal pins should connect with the grooves.

10. To attach the print, start on the backside of the frame and connect the magnet strips.

11. Work your way around the frame until the print is attached all the way.

12. The Counter is now ready to use, and can hold up to 55 kg.
